- 2-, 3-, and 4-series parts stocked

Recycling with Keltruck

Keltruck is the UK's market leader in the supply of quality used and reconditioned Scania parts and assemblies. Our stock holding is the most comprehensive in Europe and covers all Scania parts; from a door handle to a complete engine; from a replacement panel to a complete cab, ready to 'drop on'.

We only supply quality Scania 2-, 3- and 4-Series parts through our Recycling department. These

can be provided 'as seen' or fully reconditioned and guaranteed - the choice is yours. The benefits of using recycled parts lie in cost effective repairs with significant savings of up to 70%.

In order to maintain our comprehensive stock levels we are always happy to negotiate the purchase of your Scania parts, new or old, and your 3- or 4-Series Scania vehicles, whether they are running or damaged.

KELTRUCK

Recycled parts, assemblies and even complete second hand vehicles can be prepared to meet your import requirements and regulations. With customers as far away as South Africa and New Zealand, we have the experience to arrange delivery CIF or FOB.
